Alpine Gardens

TO MANY, the idea of a Rock Garden seems to be an exposition of stone. The real object of a Rock Garden is to enable one to grow in their own gardens the natives of the high mountains, where snows are deep and summers very short. To be sure, all plants grown in the rockery are not natives of the Alpine regions; but the great majority are, and while the beginner is apt to feel that this is a most difficult branch of gardening, it is only necessary to begin with the many easy subjects to find it not only comparatively simple but immensely fascinating as well, and a branch that opens up entirely new delights in gardening.

An Alpine garden should be an artistic expression of rock formation, conveying the idea of a drift or out-cropping of strata rock. Not uniform or regular but rather bold and so placed as to form a harmonious picture from all approaches.

The framing of this picture, or the background, should express the note of irregularity by varying heights, groupings and staging of trees and shrubs so they will co-ordinate with the feeling conveyed by the middle-ground.

The fore-ground, or detail, expressed in the vivid colors and association of dwarf conifers and shrubs, should be carefully considered. Harmony is attained when colors nearly related lead on from one to another, or are grouped together. But even contrasts become harmonious when they are perfectly true.

It is obvious, therefore, that the designer must know his subjects thoroughly; their time of bloom, color, type of foliage and form. Form and light should be the governing thought throughout the entire garden.

It is the popular belief that the building of an Alpine Garden is the easiest form of Landscape work; whereas, it is decidedly the most difficult.

It may be of assistance if we give a few suggestions as to the construction of a Rock Garden. First of all, the drainage must be perfect, for no Alpine Plant will survive a stagnant condition of the soil. If underground moisture can be supplied by means of minutely perforated pipe, so much the better. This is to supply, in a small way, the melt-

ing snows, to which all Alpines are accustomed, and should be so arranged that the water can be turned off and on at will.

Contrary to common impression, Alpines require something beside ashes and tin cans upon which to grow. While they **do** require a very **stony** soil, they need **good soil** mixed with the stones; more or less, according to the subjects being planted.

We have found that a soil mixture consisting of one-half peat, one-fourth leaf mould and one-fourth clay loam is well adapted to the successful growth of nearly all Alpines.

In building a Rock Garden, dismiss the idea of making "pockets" for your plants. This method was discarded long ago as being very unsuccessful. The soil in pockets is quickly exhausted, as well as the moisture, and after the plant has made its first growth, becomes stunted and soon dies.

All Alpines are deep rooting. This fact should never be forgotten and when building rockery, wall or bank, ample depth should be provided. It is a **deep, cool root run**, under the stones, that is required for success.

Next in importance is a thorough ramming of the soil, to preclude the possibility of any air spaces. This one mistake is the cause of more failures in planting, IN ANY KIND OF A GARDEN, than any other one thing. THE SOIL CANNOT BE PACKED TOO TIGHT AROUND THE ROOTS. But in addition, THE SOIL MUST BE LOOSE ON TOP, that the rain may easily penetrate it, that the roots may breathe, and that there may be a mulch to keep the roots cool and moist.

Alpine plants need to be planted in masses of one kind to obtain good color effects. This applies to all garden planting; but to Alpines most of all, as they are so small.

We are always glad to give all the assistance possible to our patrons, by giving them any information desired as to the especial requirements of any plant.

We use the utmost care in shipping stock. Plants and Shrubs are not dug and then left around to dry out, but each order is dug separately, put into receptacles filled with wet sphagnum moss and brought immediately to the shipping room. Each plant is then wrapped in wet

moss and oiled paper, that they may keep fresh from the start to the finish of their journey.

All of this is expensive; but it insures to the customer plants that are in good condition when received.

TERMS—Cash with order, unless it is desired to open an account with us. In that case, please send financial references.

No account opened for less than an initial order of \$5.00.

Not less than **three plants** of the same variety supplied at the dozen rate.

All prices are subject to change without notice.

This list cancels all previous lists and prices.

Landscape Department

Landscape Designs of Unusual Character

Modest or pretentious developments executed in a manner that portrays exclusive design and will meet the requirements and approval of competent critics. Our designs are created for YOUR grounds exclusively and we do not resort to the use of others' ideas or designs by trying to fit them into some situation for which they were never intended.

We execute Alpine Gardens, Herbaceous Borders, Pools, Rivulets (with an atmosphere of Nature in her most charming moods), Woodland Trails, Rock Ledges—with the feeling of movement often seen in the mountains.

If it is a Garden Gate, with little touches symbolic of your home life; or a Memorial landscape design for your loved ones, that will impart restful serenity and be permeated with an esthetic touch, we can, we believe, please you.

We create pictures on the soil.

Our charges are modest and we execute work in all parts of the country. Should you prefer to execute your own development, may we suggest an analysis of your problems and a comprehensive opinion that will greatly assist you in the ultimate artistry and economy of your contemplated projects.

CORRESPONDENCE INVITED.

Alpine Plants

ACAENA (New Zealand Bur). Alpine plants belonging to the Rose family. Inconspicuous blossoms, but having beautiful foliage. Very useful for carpeting, and thrive in light soil and full sun.

	Each	Doz.
A. Buchanani. Prostrate with pale green leaves. The flower heads have yellow bristles.....	\$.30	\$3.00
A. caesia glauca. Beautiful carpeting plants with rose-like foliage of soft grey-blue.....	.30	3.00

ACHILLEA. Well known rock plant suitable for dry and sunny places.

A. ageratifolia. Tufted growth with silvery leaves and pure white flowers. Blooms in May and June. 3 in. Fine for rockery.....	.40	3.50
A. tomentosa. Lovely silky foliage. Dwarf compact habit. Brilliant yellow heads of bloom.....	.30	2.50

AJUGA reptans. Creeping plant with stems of blue bugles in the spring.....	.25	2.50
---	-----	------

ALLIUM (Onion). Bulbous plants, with very attractive blossoms useful for the rock garden.

A. cernuum. Flowers pink on stems 9 to 12 inches. July	\$.25	\$2.50
A. fallax. Rosy purple blossoms on stems of 1 foot.....	.25	2.50
A. neapolitanum. Quite unlike the other members of this family in not having the usual onion odor. Loose heads of fine white flowers on stems 15 to 18 inches high.....	.35	3.00
A. oreophilum. An alpine member and one of the most beautiful. Two narrow recurving leaves, from which spring clustered balls of large purple blossoms on 3-inch stems.....	.40	3.50
A. schoenprasm. The Chives of old-fashioned gardens, but making a fine effect in the rockery.....	.25	2.00
A. Schuberti. One of the gems of the family. Broad, glaucous leaves with large umbels of rose red flowers on stout stems 12 in. high.....	.40	3.50

ALSINE (Alsine). Small, tufted plants, very close to Arenaria, with small flowers in great profusion. Very desirable for clothing the rocks.

A. Bauhinorum. A most beautiful dwarf Alpine, forming mats of fine green foliage, bearing an abundance of pure white flowers on slender 8-in. stems in July and August	\$.35	\$3.50
A. Austriaca. Long furry foliage of lovely green. White flowers30	2.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
A. laricifolia. Very similar to <i>A. Bauhinorum</i> . Both are invaluable in the Rock Garden and ideal for carpeting choice Crocus and the tiny <i>Narcissi</i>35	3.00
A. pinifolia. Makes dense tuffets of foliage, covered in spring with small white flowers on 5-in. stems.....	.30	2.50
ALYSSUM (Madwort). Beautiful, showy plants for rock work, bedding, etc. They like a sunny position and well drained soil.		
A. montanum. One of the best known varieties for the Rock Garden. Mats of grey-green leaves and heads of golden yellow blossoms in June.....	\$.40	\$3.50
A. "Silver Queen." A very beautiful variety from England. Masses of pale yellow blooms.....	.35	3.00
A. serpyllifolium. Very dwarf, 4 to 5 inches high, with racemes of pale yellow flowers and rough, hoary leaves. Charming for the rock garden. Very rare. True variety	.60	5.00
A. spinosum. A woody stemmed plant with silvery leaves and numerous small, yellow blossoms. About 6 inches high and very branching habit. A gem for the rock garden40	4.00
ANDROSACE (Rock Jasmine). Typical Alpines, most fascinating because of their great beauty. Some of them are reputed difficult to grow, their worst enemy being early spring rains. They require very gritty soil, the stones furnishing the cool moisture their roots enjoy. In sticky clay or hot, loose sand, they will soon dwindle and die.		
A. chamaejasme. Silver rosettes with blossoms opening pure white and fading to pale pink. Rare.....	\$.50	\$5.00
A. Chumbyi. Densely silky with glowing pink blossoms. Blooms profusely. Very choice.....	.50	5.00
A. lanuginosa. One of the most beautiful. Trailing growth and soft, silvery foliage. The blossoms are soft lilac-rose, lasting nearly all the summer.....	.35	3.50
A. primuloides. Rosettes of very silky foliage and heads of rosy lilac blossoms on stems 4 inches high. May.....	.35	3.50
A. sarmentosa. One of the easiest and best. Rosettes of silky foliage and heads of verbena-like blossoms of pink on stems about 6 inches high. From the Himalayas. June-July35	3.50
A. vitaliana. Unlike most other Androsaces. Forms a prostrate mass of dark green foliage with flowers of clear gold. Very choice and very beautiful.....	.50	5.00
A. Watkinsi. Smaller, condensed form of <i>A. sarmentosa</i>50	5.00
ANEMONE (Windflower). Lovely, graceful Alpines, in most cases delighting in deep, rich soil in full sun.		
A. Halleri. Lovely rich violet blossoms, all silky outside. Very choice.....	\$.50	\$4.00

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
A. pulsatilla rubra. A variety with blossoms of deep violet red35	3.00
A. sylvestris. Fine for cool, moist corner of rock garden or border. Large white blossoms on nodding stems of about 12 inches. Very free blooming. May-June.....	.35	3.50
ANTENNARIA neodioica. Prostrate silvery carpet, span- gled with white blossoms.....	.25	2.50
ARABIS (Rock Cress). One of the most common of rock plants. Or- dinary soil is suitable, but they must have a sunny position. We offer the best of the many varieties.		
A. alpina nana. Compact growth and somewhat more dwarf than the common variety.....	\$.25	\$2.00
A. rosea. Forms neat rosettes of glossy leaves bearing 4-inch stems of rose colored flowers in the spring. Not a variety of <i>Arabis alpina</i>25	2.50
procurrens. Prostrate growth with white blossoms on slender stems in early spring.....	.25	2.50
stellaris roseus. Similar in growth to <i>A. rosea</i> , but foliage is not glossy. Another new and very choice variety from the Royal Botanic Garden.....	.25	2.00
ARENARIA (Sandwort). As their name implies, the majority of these plants do best in sand and full sun. Beautiful and of easy culture, they are most at home in the rock garden.		
A. caespitosa. A close tufted plant of mossy growth, studded with white flowers. Charming for the rock garden	\$.25	\$2.25
A. gracilis. Prostrate growth with deep green foliage and white blossoms. Fine for rock garden.....	.35	3.50
A. tmolea. Dwarf cushions of small, stiff leaves. White flowers in sprays of two or three stems.....	.35	3.50
ARMERIA (Sea Pink or Thrift). Small perennials with leaves in rosettes close to the ground. Very easy culture, preferring a sunny position in light soil.		
A. caespitosa vera. Very rare. Spiny leaves, forming very compact rosettes. Pink flowers. Rockery.....	\$.45	\$4.50
A. juncea alba. A rare and tiny species bearing heads of white flowers on 4-inch stems in June. Fine for rock garden25	2.50
ARTEMISIA frigida. Silvery spires of foliage, filmy and graceful for rock garden or border. 12 to 18 inches tall	.25	2.50
ASPERULA hexaphylla. Rare plant with fragile, 4-inch stems, set with whorls of leaves and ending in a bunch of pearly pink starry trumpets.....	.25	2.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
ASTER alpinus Goliath. Large purple-blue blossoms on 10-inch stems. Fine for rock garden or edge of border	.25	2.50
A. subcoeruleus "Florist Delight." Giant flowers of lavender blue. New and choice.....	.35	3.00
ASTILBE rubra. Fine variety with massive blossoms of rose color. 4 feet.....	.40	4.00
A. simplicifolia. Beautiful dwarf variety from Japan. Panicles of white blossoms on stems of 6 inches to 9 inches. Lovely foliage. Very rare.....	.50	5.00
BELLIUM bellidioeides. A dainty little miniature of the <i>Bellis perennis</i> , except that it throws out numerous runners and so forms a wide mat, covered in summer with small white Daisies. Fine for rockery.....	.25	2.50
B. nivale. Similar to above with white daisies stained red underneath25	2.50
CAMPANULA (Bellflower). The Bellflowers are for the most part of a very elegant habit and beautiful appearance. The perennial varieties are all of great beauty, the taller ones being suitable for the border and very valuable as cut flowers, while the dwarfer sorts are well adapted for the front of borders and for rockeries. The most of the varieties are easily grown and unless otherwise specified, prefer a well drained, rather rich, sandy loam. Those adapted to rockery culture are among the choicest of perennial plants.		
C. bellidifolia. A beauty for the alpine garden. Rosettes of spoon-shaped leaves, covered with violet bells on stems of two or three inches.....	\$.50	\$5.00
C. Bellardii. Similar to <i>C. pusilla</i> , with myriads of silvery blue bells, from June to August. 4 inches.....	.50	5.00
C. carpatica. The well known Carpathian Bellflower, blooming profusely nearly all summer. Fine for border or rockery25	2.50
C. caespitosa. Forms a central tap root from which it throws a dense cushion of leaves. From this comes a profusion of lovely hanging bells of clear blue. Exquisite35	3.50
C. elatines. Choice plant from the Cottian Alps. Slightly hairy leaves and clear violet blue bells on 3-inch stems	.35	3.50
C. garganica. Invaluable sun-loving rock plant. Masses of star-shaped blue blossoms. 3 inches.....	.30	2.50
C. linifolia. Fine form of <i>C. rotundifolia</i> , bearing large violet blue blossoms nearly all summer.....	.35	3.50
C. muralis (Portenschlagiana). Very dwarf plant covered with blue-purple flowers in June. Fine for wall or rock garden35	3.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
C. pilosa. Tufts of foliage from which rises one stalwart stem of 6 inches, bearing an enormous bell of blue, all bearded outside with a fluff of fine hairs.....	.35	3.50
C. pusilla. One of the very choice rock Bellflowers. Strong grower with a profusion of blue flowers during July and August. About 3 inches high.....	.35	3.50
C. pusilla alba. Charming white form of the above.....	.40	4.00
C. pusilla, Miss Willmott. A lovely variety with soft, pale blue flowers. New and very choice.....	.50	5.00
C. Raddeana. A very handsome perennial, forming a compact bush some 12 inches high, with dark, wiry stems and large purple flowers. Very beautiful if planted near a low shrub in the rockery, to act as a light support for the beautiful blossoms.....	.50	5.00
C. rhomboidalis. Lovely deep blue bells on stems 18 inches to 2 feet high. Fine for border or larger rock garden....	.40	4.00
C. Scheuchzeri. Alpine form of <i>C. rotundifolia</i> with immense bells of richest violet.....	.40	4.00
C. Olympica (new). Large, deep lavender blue flowers on stems 8 inches high. Compact growth. Very fine.....	.50	5.00
C. Tommasiniana. A lovely Italian Alpine with narrow blue flowers on slender stems. It forms a dense tuft and flourishes in light soil on rock work. 9 inches.....	.75	7.50
C. turbinata. A beautiful variety, forming close mats of foliage and bearing large saucer cups of blue, sitting close to the plant and fairly smothering it. June and July25	2.50
C. turbinata alba. Lovely white form of above.....	.35	3.50
C. Waldsteiniana. A Hungarian rock plant of exquisite beauty. It has upright and star-shaped blue flowers on short stems. It does well in a cool part of the rock garden in gritty loam. Scarce and very choice.....	.75	7.50

CLEMATIS (Virgin's Bower).

C. recta grandiflora. One of the best hardy perennials. A strong, erect growing plant with heads of creamy white flowers. Is best moved when young.....	\$.50	\$5.00
C. recta purpurea. Very attractive form with deep reddish purple foliage. Both varieties are a great addition to the perennial garden or large rock garden.....	.75	7.50
C. Cote d'Azure. Lovely new shrubby variety from France. Grows about 3 feet high and in July is covered with beautiful tubular blossoms of clear blue.....	1.00	
C. montana rubens. Foliage reddish when unfolding. beautiful blossoms of pink in June. Very handsome. Strong plants50	

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
C. paniculata. The well known climber with pure white, very fragrant flowers in August and September. Seed pods very decorative. 2 year plants.....	.25	2.50

CORYDALIS (Fumitory). Ornamental, early flowering plants, especially useful for half-shady positions, but requiring good drainage. All have beautiful foliage, usually blue-green.

C. cheilanthifolia. Handsome variety with fernlike foliage and long spikes of yellow blossoms, 10 to 12 inches in height. Prefers rich, well drained, stony soil.....	\$.35	\$3.50
--	--------	--------

C. lutea. An everblooming, dwarf variety with golden flowers. Lovely in the rock garden.....	.35	3.50
---	-----	------

C. ochroleuca. Lovely grey-green foliage and pale yellow blossoms throughout the season. 1 foot.....	.35	3.50
---	-----	------

CYCLAMEN (Cyclamen). Beautiful, hardy plants for shady, well drained situations. Especially desirable for planting on slopes under trees and in semi-shady places in the rock garden. We are pleased to be able to offer a limited quantity.

C. hederæfolium. A spring blooming variety with brilliant carmine blossoms and showy leaves, beautifully marbled with white.....	\$1.00
---	--------

DIANTHUS (Pinks). Almost all Pinks are of the easiest culture in any well drained soil and sunny position. Some of the choicest subjects for the Alpine Garden are to be found among them.

D. alpestris. Beautiful Alpine Pink with glaucous, blue foliage. Blossoms of deep rose, intensely sweet and very much fringed. Very choice for sunny rockery.....	\$.50	\$5.00
--	--------	--------

D. alpinus (Alpine Pink). This is one of the loveliest of all rockery Pinks, with glossy leaves and large flowers of brilliant rose, produced during June and July. It thrives best in loam with some lime added and perhaps a little shade during the hottest part of the summer. A gem for the rock garden, 6 inches. (Not like D. a. Allwoodi.)35	3.50
---	-----	------

D. Caesius. The true Cheddar pink. Blue-green leaves and rose colored blossoms. 6 inches.....	.25	2.50
--	-----	------

D. Caesius Arvernensis. Very dwarf form with almost stemless blossoms of rose color.....	.35	3.50
---	-----	------

D. fragrans. White, single pinks on stems 8 inches tall. Deliciously fragrant.....	.35	3.50
---	-----	------

D. frigidus. Very dwarf, tufted habit. Lovely rose pink flowers. Choice.....	.50	5.00
---	-----	------

D. Roysii. Hybrid of D neglectus with much larger blossoms. Slow to increase. The true variety is very scarce	.50	5.00
--	-----	------

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
D. sylvestris (Wood Pink). Bluish foliage and salmon pink flowers on stems about a foot high. Likes an open, sunny place in stony loam and a slight covering of stone chips upon the surrounding soil is beneficial.....	.35	3.50
D. zonatus. Lovely plant with glaucous foliage and countless rosy flowers. True variety from the Royal Botanic Garden40	4.00
DRABA (Whitlow Grass). One of the important spring flowering plants for the rockery. Very dwarf and compact with numerous small flowers in early spring. They require an open soil and sunny position.		
D. aizoides. Forms beautiful little rosettes of hairy leaves, covered in spring with bright yellow flowers about two inches high40	4.00
D. incana Adamsii. Mats of grey, hoary leaves and white flowers on minute stems.....	.35	3.50
DRYAS Sundermanni. An improved and very choice variety of <i>D octopetala</i> , with large white flowers, pale yellow in bud. Very scarce. 6 inches.....	.50	5.00
ERINUS (Wall Erinus). Very attractive spring flowering plants for the rock garden or dry wall. Thrives best in steep parts of the rockery where water cannot lodge. Requires a little shade from the mid-day sun.		
E. alpinus. Purple flowers in racemes about 2 inches long	\$.25	\$2.50
E. alpinus albus. A white variety of the above.....	.25	2.50
E. alpinus roseus. Sprays of bright pink flowers. Very attractive in clumps.....	.35	3.50
ERODIUM (Heron's Bill). Very choice and valuable race of plants belonging to the Geranium family. The exquisite veining and blotching of the blossoms gives them an unusual beauty and the foliage in nearly every variety is very lovely. Requires a sunny position in well drained, gritty soil. Very hardy.		
E. absinthioides amanum. Delicate and lovely variety; very dwarf habit. Flowers pure white on stems of 6 in. .	\$.50	\$5.00
E. corsicum. Forms mats of downy, crumpled leaves. Lovely rose-pink blossoms, delicately veined with a deeper shade.....	.50	5.00
E. romanum. Silvery foliage with leaves simply cut. The flower stems are about 6 inches high, carrying a head of about six bright pink blossoms.....	.50	5.00
E. roseum (chamaedroides). Mats of deep green foliage covered all summer through with lovely pink blossoms, veined deeper40	4.00

WOLCOTTS LTD., JACKSON, MICHIGAN

Each Doz.

EUPHORBIA (Spurge).

E. myrsinites. A choice variety for hot, dry places in the rock garden or border. The growth is trailing, with stems of about 6 inches in length clothed with glaucous blue foliage and bearing heads of clear yellow blossoms \$.25 \$2.50

ERYNGIUM (Sea Holly). Handsome ornamental plants for the hardy border and especially useful for striking effects in landscape work.

E. amethystinum. Distinct, glistening blue blossoms. Finely cut foliage. 2 feet. Splendid variety..... \$.35 \$3.50

E. Bourgati. Bright, steel blue flowers and stems. Foliage deeply cut; 2½ ft..... .35 3.50

GENTIANA (Gentian). The Gentians furnish the rock garden with some of its most glorious subjects. While many are extremely difficult, others are comparatively easy and all will repay any effort made to give them conditions to their liking. Nearly all Gentians enjoy peat mixed with light loam and fine stones. They also require moisture during the summer and complete dryness during the winter. They do much better if planted close to other low growing or carpeting plants; like thin grass. Not, however, of a rampant nature, or they will soon be run out. Top dress in spring with coarse sand, or very small stones, partially covering the tufts, that it may work down between the shoots.

G. acaulis (Gentianella). One of the most beautiful Alpines. Large trumpets of intense blue on 3-inch stems. Very choice..... \$.75 \$7.50

G. cruciata. An easy and vigorous Gentian for deep soil in a sunny garden. Clustered heads of bright blue blossoms, on stems 12 inches high, in August and September .50 4.00

G. Farreri. A new variety from China, of great beauty. Vigorous habit. semi-prostrate growth with sky-blue flowers and white throat. Blossoms continuously from August to frost..... .75 7.50

G. Purdomi. Large, intense sapphire-blue flowers, speckled white in the throat..... .50 5.00

G. Rochellii. Stiff little rosettes of leaves with upstanding wide open trumpets of lovely azure blue..... .75 6.00

G. septemfida. One of the best and of easiest culture. Heads of brilliant blue blossoms in August. 6 to 12 inches high..... .50 4.00

G. septemfida procumbens. A high alpine development with prostrate stems ending in a large open trumpet of clear blue. Very rare..... 1.00

GERANIUM (Crane's Bill). An easily grown, long flowering group of plants, very valuable for both rock garden and border.

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
G. cinereum. Silvery foliage and rosy blossoms on 6-inch stems. Choice.....	\$.40	\$4.00
G. Wallichianum. Charming plant of spreading habit and flowers of a beautiful shade of pale blue.....	.50	5.00
GEUM (Avens). Excellent border or rock plants, liking plenty of sun above and moisture at the roots. They produce very showy, bright colored flowers from June to August.		
G. montanum. One of the most valuable of Alpines. Golden yellow blossoms on stems 3 to 6 inches high. Very lovely planted with Anemones. May.....	\$.50	\$5.00
G. pyrenaicum. Similar to above but somewhat larger.....	.50	.500
GLOBULARIA (Globe Daisy). Shrubby plants for the hardy garden or rockery, producing fluffy balls of blue flowers during the summer. They all require light soil in a warm, sunny position.		
G. cordifolia. A small variety forming flat, dark green rosettes, covered in June with heads of blue fluff.....	\$.40	\$4.00
G. nana. Very dwarf, about one inch high. Forms compact mats, covered in June with balls of lilac-blue. For choice place in rockery.....	.50	5.00
G. nudicaulis. Dwarf plants for well drained but not too hot places on the rockery. Heads of steel blue, fluffy blossoms on stems of six inches.....	.40	4.00
GYPSOPHILA (Chalk Plant). Exceedingly useful plants for the garden, adding both grace and beauty to any planting. They will thrive in any open and sunny position and blossom over a long period.		
G. acutifolia. Similar in habit to <i>G. paniculata</i> , but with pale pink flowers. Very useful and decorative.....	\$.35	\$3.50
G. cerastoides. Excellent plant for the rockery or very sandy soils, bearing a profusion of large white flowers, veined pink. 3 inches.....	.30	3.00
G. glabrata. A dwarf, mat-forming perennial bearing a multitude of small, blush-pink blossoms. New and excellent30	3.00
G. repens. Very attractive trailing plant for rockery or dry wall. Covered with small white flowers.....	.25	2.00
G. Sundermanni. A hybrid between <i>G. repens</i> and <i>G. cerastoides</i> . Low in growth with beautiful large white blossoms in greatest profusion. Very choice.....	.35	3.50
HABERLEA. A near relative of <i>Ramondia</i> and requiring same treatment. Makes a flat rosette of saw-toothed leaves covered in early summer with sprays of lilac-lavender flowers like a small streptocarpus.		

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
H. Ferdinand-Coburgi. A specially fine form with larger blossoms than the type, wide-open mouth and speckled with gold in the throat.....	\$1.00	
HELIANTHEMUM (Rock or Sun Rose). Exceedingly useful as well as beautiful low growing plants for either the hardy garden or rockery. They are literally covered all summer with their delicate, crinkled blossoms, in almost every color of the rainbow. They demand sun and sandy soil and are especially valuable for places too poor to grow other plants. We have proven them perfectly hardy here, in spite of their reputation to the contrary. Should be trimmed back to prevent becoming straggly35	3.50
HERNARIA (Rupture Wort).		
H. glabra. Neat, evergreen, mat-forming plant with beautiful deep green foliage. Turns bronzy red in winter.....	\$.25	\$2.50
HEUCHERA (Alum Root). One of the most desirable perennials for a hardy garden or for the rockery. Compact growth with handsome dark green, mottled foliage, from which spring slender stems about a foot high bearing panicles of bright scarlet bells. Very light and airy in effect in the garden and fine for cutting.		
H. gracillima rosea. Carmine-rose; lovely color.....	\$.35	\$3.00
H. Pluie de Feu. Brilliant scarlet.....	.35	3.00
HOMOGYNE alpina. Like a small Coltsfoot. Glossy leaves and pretty pink tassels. Half shade. 4 inch.....	.35	3.50
HUTCHINSIA (Hutchinsia).		
H. alpina. Lovely Alpine for cool banks. Mats of deep green foliage covered with dainty, pure white flowers from May to July. 2 inches.....	\$.35	\$3.50
HYPERICUM (St. John's Wort). Very ornamental plants, especially valuable in the garden. Their foliage is attractive, habit good, and their late flowering makes them very desirable. They prefer a rich, sandy loam and if given partial shade, the blossoms last longer.		
H. coris. One of the jewels of the race, forming spreading tufts of blue foliage covered with cups of clear gold on threadlike stems of 6 or 8 inches, the numerous stamens giving them a skyrocket effect. Especially fine for the rockery	\$.50	\$5.00
H. olympicum. Upright growth, about a foot high. Leaves grayish green; flowers large, golden yellow. Very handsome35	3.50
H. polyphyllum. Rare. Glaucous foliage. Flowers yellow in dense terminal cymes. In bloom all summer.....	.35	3.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
H. reptans. Beautiful, absolutely prostrate variety, forming a perfect sheet over the rocks, covered with enormous roses of gold, the outside petals being varnished with mahogany, the center having the characteristic shower of stamens. A gem every rock garden should possess	.50	4.00
IBERIS (Candytuft). The evergreen Candytufts rank high among the rock garden flowers. They are of half-shrubby growth and in April and May become smothered with bloom. Ordinary well drained soil suits them and they never look better than when planted above some rock ledge so the growth may hang over its face.		
I. Jordani. An exceedingly choice variety for rockery. Stems trailing, about 6 inches long, the tips bearing heads of pure white blossoms of large size.....	.50	4.50
I. Sempervirens "Snowflake." A splendid new variety with large white flowers and evergreen habit.....	.35	3.00
IRIS Species. Many of the species Iris are among the choicest of plants for the Rock Garden. We list a few of the best.		
I. arenarius. Creeping, tiny Iris of great beauty. Golden yellow flowers with orange beard produced in great profusion. Very choice.....	\$.75	
I. Bulleyana. Grassy species from China. Allied to Sibirica but much dwarfer. Lovely shade of blue. Rare. 1 ft.	.75	
I. chamae-iris. Flowers yellow. Very dwarf.....	.25	2.50
I. Chrysographes. Flowers lovely, deep velvety violet-purple. Very rare.....	.75	
I. Forrestii. Striking variety from China. Grassy foliage. Flowers yellow with slight netting at throat. 18 inches	.50	
I. graminea. Close growing tufts with flowers of violet blue. Deliciously scented.....	.50	
JASIONE perennis. Heads of soft blue, fluffy pincushions on 6-inch stems. Blooms over a long period in summer	.35	3.50
LEONTOPODIUM Alpinum Himalaicum. An improved form, blooming later in the season. Excellent for a dry, sunny spot. This is the much-sought Edelweiss.....	.35	3.50
LINUM (Flax). Charming border plants of easiest culture and profuse bloom. Prefers sandy loam in full sun.		
L. alpinum. A rare species from the Dauphine, of prostrate growth with showers of pale blue blossoms throughout the summer.....	\$.35	\$3.50
L. narbonnense. Forms a spreading clump of attractive foliage with a profusion of azure-blue flowers with white eye. Very handsome for the rockery.....	.35	2.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
L. salsoloides. Forms mats of dwarf foliage, covered with beautiful blossoms of pale lavender on stems of 6 in. Very rare.....	.50	5.00
L. tenuifolium. Dwarf variety of great beauty with prostrate foliage and rosy lilac blossoms. Lovely for a bank or rockery. Very choice.....	.50	5.00
LYCHNIS (Campion). A family of very showy and useful plants both for the border and rock garden. Very easy culture, thriving in almost any soil, but requiring full sun.		
L. alpina. A very attractive little plant for the rockery, of tufted growth and bearing heads of pink blossoms in May and June.....	\$.25	\$2.00
L. Arkwrightii. A new and very desirable border plant, being a cross between <i>L. chalcedonica</i> and <i>L. Haageana</i> . Makes a long and lasting display in many new and lovely colors.....	.35	3.50
LYSIMACHIA nummularia (Creeping Jenny). Excellent carpeting plant for sun or shade. Showy yellow blossoms in midsummer.....		
	.25	2.00
MAZUS pumilio. Carpets of bright green foliage covered with lovely lavender-blue and white mimulus like flowers. 1 inch.....	.30	2.00
MENTHA Requieri. A tiny mint from Corsica. Cool, damp place suits it where it makes a fine carpet covered with violet mint flowers in August.....	.35	2.50
MERTENSIA (Blue Bells). One of the most attractive early blooming plants, especially useful as it thrives best in shade. Should be given a very rich soil and be left undisturbed for years.		
M. echioides. Exquisite, dwarf variety with croziers of rich, sapphire-blue flowers on stems of 8 or 9 inches. Rich soil and shady situation.....	\$.50	\$5.00
MYOSOTIS. Everyone loves "Forget-me-nots" and they make beautiful pictures in the garden in early spring. Charming alike for Rock Garden, border or by the water-side. They all require at least half shade and a fair amount of moisture.		
M. caespitosa Rehsteineri. Very dwarf Alpine variety of azure-blue; blossoms in June. Rare. 2 inches.....	\$.35	\$3.50
M. palustris semperflorens. Large, rich blue flowers with yellow eye. A charming plant for damp places and a more profuse bloomer than the type.....	.25	2.00
M. Royal Blue. An exquisite variety of Forget-Me-Not, literally covered with flowers of beautiful indigo-blue in long sprays. A mass of this makes a sight not to be forgotten. Fine for cutting. 12 inches.....	.25	2.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
M. stricta, Blue Gem. Very brilliant blue.....	.25	2.50
MIMULUS luteus. Handsome plants for moist, shady places. Grows about ten or twelve inches high, covered nearly all summer with showy yellow blossoms....	.35	3.50
MYRRHIS (Myrrh).		
M. odorata. The Sweet Cicely of English gardens. A very attractive plant having finely cut foliage resembling a large fern, and bearing panicles of lace-like white bloom in early spring. Very valuable as a background for spring blooming bulbs.....	\$.50	\$3.50
NEPETA (Catmint).		
N. Mussini, Dark Var. A new variety with deep blue flowers. Very handsome.....	\$.35	\$2.50
N. nuda. A novelty received from Switzerland. Rather dwarf and compact grower.....	.35	2.50
OENOTHERA (Evening Primrose). The Evening Primroses are excellent subjects for planting in sunny, exposed parts of the garden, and are especially fond of a sandy soil.		
O. Fraseri. Handsome yellow blossoms, freely borne for a long season. Equally useful for border or rockery. 1 ft.	\$.25	\$2.50
O. pumila. Forms neat rosettes flat on the ground, covered all summer with bright yellow blossoms. Wants both sun and sand. 4 inches.....	.35	3.50
PAPAVER (Poppy).		
P. alpinum. Like a small and more delicate Iceland Poppy having flowers of white, pink, orange or yellow and often delicately fringed. Transplants best when quite small. True stock, from Switzerland.....	\$.35	\$2.50
P. pilosum. Very attractive Alpine with showy orange flowers35	2.50
P. triniaefolium. The most beautiful of all the Alpine Poppies with its silvery foliage cut and cut again to look like lace. Very rare.....	.50	4.50
PARONYCHIA serpyllifolia. A creeping, matted little cousin of the Pinks and asking for a hot, sandy soil in full sun. Lovely glistening bracts like snow-white blossoms. Fine for carpeting. Rare and very choice....	.35	3.50
PHYTEUMA Scheuchzeri. One of the choicest Alpines, forming close masses of deep green foliage and bearing graceful balls of deep blue on foot high stems in July. Very rare.....	.50	5.00

WOLCOTTS LTD., JACKSON, MICHIGAN

PLATYCODON (Chinese Bellflower). These are closely allied to the Bellflower family and derive the name of "Balloon Flower" from the shape of the buds. They enjoy a very rich, loamy soil and are most attractive plants for the border, bearing blue blossoms for about a month or six weeks, beginning about the middle of July. They are best planted when quite young, as they do not bear disturbing after once established. Start into growth very late in the spring.

	Each	Doz.
P. Mariesi. A splendid variety of dwarf habit with very large flowers of a purplish blue color.....	\$.25	\$2.50
P. grandiflorum. Very handsome variety, about 2 feet high, blooming in July and August. Flowers a deep blue, two or three inches across.....	.25	2.50

POTENTILLA (Strawberry Flower). Very effective plants for the rock garden, with strawberry-like leaves and showy blossoms which continue for a long period. Do well in an open position.

P. alpestris. Erect growing with large, pale yellow blossoms. Fine for sunny positions.....	\$.35	\$3.50
P. apennina. Choice rock tuffet with sprays of golden blossoms in early summer. Beautiful silver foliage.....	.35	3.50
P. fragiformis. Wonderful leaves of grey velvet and large golden yellow flowers.....	.35	3.00
P. Nevadensis. Grey-green tufts an inch high which in May produce prostrate shoots 3 or 4 inches long covered with lovely flowers of brilliant yellow.		
P. pyrenaica. A choice variety from the Pyrenees, with lovely golden blossoms, one or two to the stem and suitable for the rockery or perennial garden.....	\$.50	\$3.50
P. rupestris. Pure white blossoms in early spring on graceful, spraying stems of 12 inches.....	.25	2.50

POLYANTHUS (Bunch Primrose). The Polyanthus is an indispensable spring flower and should be used largely in flower beds and borders, also wild gardens and rockeries. It likes an open, half-shady position in rich soil and under such conditions will bear flower stems a foot high.

P. "Bright Eyes." Very large rich yellow flowers with bright orange eye. Petals waved on edges. Very new....	\$.35	\$3.50
P. "Mrs. Berkeley." Remarkably fine new strain of bunch Primrose with large blossoms and clear colors—both yellows and reds.....	.40	4.00
P. "Munstead." The same fine strain perfected by Miss Jekyll, which we introduced to the American public twenty years ago. All shades of yellow to white.....	.30	2.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
PRIMULA AURICULA Alpina. One of the choicest plants for the Alpine garden. Huge rosettes of smooth foliage often nearly white with meal. Immense trusses of large blossoms in a great range of colors. Our stock is entirely from prize winning named varieties from Scotland and can in no way be compared with the strain of Auricula usually offered in this country.....	.50	4.50
P. Beesiana. Distinct type of Bulleyana and pulverulenta but later than either, with flowers of various shades of purple with yellow eye; 3 ft.....	.50	4.50
P. Bulleyana. A beautiful species from Yunnan. Flowers rich golden yellow, shaded orange buff, borne in whorls on stiff stems. 2 ft.....	.35	3.50
P. Bullesiana Hybrids. A new strain of Hardy Primuals with the constitution of P. Japonica resulting from the crossing of P. Bulleyana and P. Beesiana. Colors range from cream to many shades of yellow, orange, purple, lilac, pink and crimson. They are very hardy and prefer a half shaded position that is fairly moist.....	.50	4.50
P. cashmiriana. Flowers much the same as denticulata but of a deep purple.....	.30	3.00
P. carniolica. Very rare species of great beauty. Glossy rosettes and large flowers of soft rose with white, mealy eye. Very choice.....	1.00	
P. Clusiana. Wonderful Primula from high Alps of Austria.. Rosettes of glossy leaves developing into strong clumps. Flowers glowing carmine with white eye on stems 3 or 4 inches high. Prefers an open position with part sun.....	1.00	
P. cortusoides. A distinct Siberian species, with soft, wrinkled, heart-shaped leaves. Flowers in early summer, deep rose. Prefers light, rich, well drained soil, in a sunny position, in border or rockery. 10 inches....	.35	3.50
P. denticulata. Very handsome, large flower heads, in various shades of lilac. One of the first to bloom. Prefers a moist, shady position. 2 feet.....	.30	3.00
P. denticulata alba. A beautiful white form of the above. 2 feet.....	.50	4.00
P. farinosa. The lovely little Bird's-eye Primrose. Rosettes of green leaves hoary with silver underneath and rounded heads of rosy lavender flowers in May and June.....	.50	4.50
P. frondosa. A form of the preceding. Little stronger growth and meal on both sides of the foliage.....	.35	4.00
P. Florindae. The giant of the Sikkimensis group. Lush foliage and tall spikes bearing a huge umbel of large, yellow nodding flowers.....	.50	5.00

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
P. Japanica splendens. One of the oldest of the candelabra group. Large red flowers on tall stems. Prefers damp situation.....	.35	3.50
P. glaucescens. Smooth, leathery leaves forming rosettes much stiffer than those of P. Clusiana. Large heads of lilac-purple flowers on stems 3 or 4 inches high. Rich soil and half shade.....	.75	7.50
P. Littoniana. One of the most striking. Flowers lilac, in spikes, with vividly contrasting buds of red.....	1.00	
P. La Lorraine. A choice hybrid of the Sieboldii type with handsome foliage and large deep crimson flowers on stems of 10 inches. Imported stock.....	1.00	
P. Moerheimi hybrids. Fine range of colors of the Japonica type. Very hardy and fine for damp situations	.40	4.00
P. spectabilis. The rarest of the Arthritic Primulus. Rosettes of glossy leaves, like a tiny Auricula, and enormous rosy flowers on 3-inch stems. A gem.....	.75	7.50
P. Sieboldi rubra grandiflora. Deep red blossoms on 6-inch stems. Very large flowers.....	1.00	7.50
P. Sieboldi alba. Large, pure white blossoms on strong stems	1.00	7.50
P. sikkimensis. One of the loveliest of the Primroses. Umbels of drooping, soft yellow bells in June. Prefers boggy soil and shade. 1 foot.....	.50	5.00
RAMONDIA. We take much pleasure in offering our patrons this very choice and interesting gem for the Rock Garden. The densely hairy leaves form a flat rosette, throwing scapes of exquisite violet blossoms with yellow centers. They should be planted in a cleft of the rocks, so water cannot lodge in the crown, in a mixture of coarse sandy peat, facing north. Considered by best authorities the finest and choicest rock plant.		
R. pyrenaica. Large plants, 8 years old.....	\$1.00	\$10.50
Smaller plants, blooming size.....	.75	
R. Nathaliae. The Carpathian form. Brilliant deep lilac flowers. Very scarce.....	1.00	
SAXIFRAGA DACTYLOIDES (Mossy Saxifrage). The Mossy Saxifrages are ideal plants for amateurs. They form perfect little carpets of evergreen that quickly spread over the ground or cover the stones with beautiful, close-tufted verdure, which, in spring and early summer, become jeweled with sprays of blossoms in pink, white or red. Most of them are easy to grow and ordinary, well drained, loamy ground, with which pieces of grit or stone have been mixed, suits them admirably. They prefer half-shade.		
S. aquatica. Handsome mossy Saxifrage with very finely cut foliage and tall, branching stems bearing sprays of brilliant white flowers.....	\$.35	\$3.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
S. canaliculata. A beautiful mossy from the Alps of Calabria. Dark green cushions of foliage with erect trusses of pure white flowers.....	.40	4.00
S. Guildford Seedling. Small red flowers, compact grower	.35	3.50
S. Rhei superba. Deep rose colored flowers; 4 inches.....	.35	3.50
S. trifurcata. An especially handsome mossy, with deep green foliage and branching sprays of large, pure white flowers35	3.50
S. mossy mixed. A fine mixture from finest named varieties25	2.50
 SAXIFRAGA EUAEIZOONIA (Silvery Rockfoil). A class of very beautiful plants, natives of the European Alps and Arctic regions. Nearly all have lime encrustations on the foliage, making them glorious subjects for the rock garden. They thrive in light, well drained stony loam, with a little lime added, but must be planted flat against the rocks in such a manner as to prevent water lodging in the crowns.		
S. aeizoon. A treasure for the Alpine Garden, forming rosettes of silver beaded leaves and bearing plumes of creamy white blossoms; 8 to 10 inches high, in early summer	\$.50	\$5.00
S. aeizoon brevifolia. Smaller than type and much more refined in appearance.....	.50	5.00
S. aeizoon densa. Smaller and more compact than above variety and altogether very charming. Very silvery	.50	5.00
S. balcana. Incurved rosettes of encrusted foliage. Flowers white speckled purple.....	.35	3.50
S. cotyledon. Large rosettes of broad, encrusted leaves and large pyramids of white flowers. The flowering rosette dies after blooming but carries on by the surrounding rosettes.....	.50	5.00
S. Hostii. Large flattened rosettes of silver. Sprays of white blossoms speckled red.....	.50	5.00
S. Kolentiana. Distinct, pointed, incurved rosettes. Lovely pink flowers in dark-red calyx. 9 inches.....	.75	7.50
S. lantoskana. Arching sprays of creamy white flowers. Very fine. 12 inches.....	.50	5.00
S. longifolia. Called the "Queen of Saxifrages." Beautiful encrusted rosettes, lovely enough in themselves; but the crowning glory is the immense panicle of white bloom, 1 to 2 feet long. Should be planted flat against the rock. Our stock is direct from the Pyrenees Mountains75	7.50
S. Macnabiana. Another very choice encrusted, requiring same treatment as all the Euaeizoons. Panicles of white blossoms, spotted red.....	.35	3.00

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
S. sancta. Wide mats of green leaves, with edges pitted with silver. Very handsome.....	.50	5.00
S. splendens (longifolia x Cotyledon). One of the very choice hybrids of the encrusted section. It has more of the longifolia rosette and the looser inflorescence of the Cotyledon parent. A most attractive plant for the rock garden, the silvery edging of the leaves being most interestig. Plant in loamy soil, with plenty of grit; limestone, if possible. Top dress with coarse gravel....	1.00	
Plant all silver or encrusted Saxifrages flat against a rock.		
S. apiculata. Pale green rosettes and large primrose-yellow flowers in early spring. Very beautiful and very rare50	5.00
S. Elizabethae. One of the jewels for early spring bloom. Forms mats of spiny foliage covered with bright, soft yellow flowers on 2-inch stems.....	.75	7.50
S. sarmentosa. Attractive hairy leaves variegated with white. Pink and white flowers on 5-inch stems.....	.35	3.50
S. umbrosa, London Pride. Spikes of white flowers, spotted pink, and dark green foliage. Very fine.....	.25	2.50
SEDUM (Stonecrop). The dwarf varieties are charming plants for sunny positions in the rockery, etc., and the taller kinds make effective color groups in the border. They thrive in almost any soil. They are especially fond of sand and full sun.		
S. album. Foliage green. Small white flowers. 3 inches....	\$.25	\$2.00
S. anacampseros. Forms long trunk-like stems growing flat on the ground and ending in heads of pink stars....	.25	2.50
S. anglicum. A very choice variety of Sedum with delicate pink, feathery blossoms. It is reputed hard to grow but has been most rampant with us in a sandy soil and full sun. A gem for the rockery.....	.25	2.50
S. corsicum. A form of S. dasyphyllum, with spraying branches of slightly hairy foliage. Very choice.....	.40	4.00
S. dasyphyllum. A rare variety from Southern Europe, having fat, glaucous blue leaves set tight on their 3-inch stems. Slightly resembles S. anglicum, but bluer. Flower pink and very profuse.....	.30	3.00
S. Ewersi. Gray foliage and attractive growth. Rosy lilac flowers. Choice.....	.35	2.50
S. Forsteri. Glaucous blue foliage, trailing growth. Flowers yellow25	2.50
S. kamtschaticum. Foliage deep green, coarsely toothed, numerous yellow flowers in flat heads; 6 inches.....	.25	2.50
S. Nevii. Very dwarf. Deep green foliage, white blossoms in early summer.....	.35	3.50

WOLCOTTS LTD., JACKSON, MICHIGAN

	Each	Doz.
S. spathulifolium. Charming dwarf Sedum with bluish green foliage and golden blooms on stems of 3 inches....	.35	3.00
S. stoloniferum. Long, rooting stems, blunt leaves, scalloped at their edges, ending in heads of pink flowers....	.25	2.50
S. Telphium Borderi. Very dwarf with heavy, blue-green foliage. Attractive variety for both rock garden and border edge.....	.35	3.50

SILENE (Catchfly). A charming class of plants for the rock garden. They are closely allied to the Pink family and require much the same treatment. They bloom nearly all summer and are very desirable additions to the rockery.

S. acaulis. High alpine. Close green cushions spangled with pink, stemless flowers in June. Very choice.....	\$.35	\$3.50
S. Lerchenfeldianum. Trailing growth, grey-green foliage. Covered with small pink blossoms in summer.....	.35	3.50
S. monachorum. Very dwarf variety for cool rocks. White blossoms on 2-inch stems all through the summer. Rare35	3.50
S. quadrifida. Fine for damp and partially shady spots in rock garden. Branching, airy stems of 4 or 5 inches with a shower of pure white blossoms.....	.35	3.50
S. saxifraga. A choice Alpine of mossy growth. Flowers white, in great profusion.....	.35	3.50

SOLDANELLA (Moonwort). Charming subjects for the Alpine Garden. Natives of Switzerland, they are perfectly hardy and thrive well in moist, cool soils.

S. alpina. One of the gems of the rock garden. Round, leathery leaves, forming large mats, from which spring many stems bearing wide fringy blossoms of violet in early spring. Very beautiful and very choice.....	\$1.00
--	--------

THYMUS (Thyme). Valuable for carpeting, walls and walks. Aromatic foliage.

T. serpyllum. Very desirable creeping plant for the rockery. Foliage dense, of a handsome dark green; clouds of delicate purple flowers.....	\$.25	\$2.50
T. Chamaedrys nummularia. Mat forming, sweet scented and producing rosy lilac flowers after the rest are through blooming.....	.35	3.50
T. serpyllum pulchellum. Attractive new variety with red stems and silvery sheen to leaves.....	.35	3.50

WOLCOTTS LTD., JACKSON, MICHIGAN

TROLLIUS (Globe Flower). Beautiful spring blooming plants for damp, shady places. Very useful in the rock garden.

	Each	Doz.
T. Golden Queen. A beautiful new hybrid. Very vigorous growth with huge flowers having outer petals a rich gold, centers of intense orange. 3 feet. Award of Merit from Royal Hort. Society, London.....	\$.40	\$3.50
T. Yunnanensis. Beautiful rock plant with large, clear yellow flowers. 1 foot.....	.40	3.50

VERONICA (Speedwell). A family containing some of the most beautiful subjects for the hardy garden and rockery. Given a rich, well drained soil in an open situation in full sun, they will all thrive in an amazing manner.

V. gentianoides. Beautiful variety with spikes of large flowers, palest blue, edged deep blue, in June and July, 1 ft.....	\$.35	\$3.50
V. incana. Silvery foliage with spikes of pale blue flowers. Valuable for both rock garden and border.....	.25	2.00
V. multifida. Dwarf variety, especially fine for the rock garden. Foliage deeply cut, with flowers of pale blue on stems of 5 to 6 inches.....	.35	3.50
V. prostrata. Trailing variety with lovely blue flowers in May.....	.25	2.00
V. repens. A very attractive variety for any warm place in good soil; sun or shade. Forms sheets of soft green, smothered the summer through with very pale blue heads of bloom.....	.25	2.50
V. rupestris. A most charming rock plant forming thick masses of deep green foliage which is smothered in June with bright blue flowers. A gem for the rock garden, dry wall or for edging the border, if raised a little above the path, as its growth is absolutely prostrate . True variety35	3.50
V. spicata nana. Tiny species with deep blue spikes 5 inches high.....	.35	3.50
V. Teucrium "Royal Blue." Large flowers of brilliant deep blue on stems of 9 inches. True variety.....	.35	3.50
V. True Blue. Very handsome with brilliant blue flowers late in summer. 1 foot.....	.25	2.00
V. Traversi. A very hardy variety of the beautiful shrubby Veronicas from New Zealand. Forms compact bushes of dark green foliage, bearing a profusion of pale mauve blossoms in late summer.....	1.00
